

AquaPoly 511

A unique micronized oxidized polyethylene wax composite for improved scuff and mar resistance in aqueous and solvent based systems

Features and Benefits

- A synergistic blend of high molecular weight waxes including polyethylene
- Provides optimum levels of scuff and mar resistance along with excellent slip and mobility
- Easy to disperse fine powder that can be incorporated into aqueous paints, inks and coatings with high speed mixing
- Compare to AquaPolyfluor 411 (without PTFE)

Composition

Modified oxidized HDPE

Recommended Addition Levels

0.5-2.0% (on total formula weight)

Systems and Applications

Solvent and water based coatings. Industrial coatings (including plastic, metal and leather); architectural wall and trim paints; stains, sealers and varnishes; wood coatings; printing inks and OPV's (including flexo and gravure); coil coatings.

Typical Properties*

	<u>AquaPoly 511</u>
Mean Particle Size (µm)	6.0 - 8.0
Maximum Particle Size (µm)	22.00
Melting Point °C	117 - 123
Density @ 25 °C (g/cc)	0.97
NPIRI Grind	2.5 - 3.5
